GNSR-70

GNSR-100X

### What is it?

A router solution for vacation rentals. In addition, we assist our clients with email marketing to ensure they are maximizing their return from their investment.

Branded WiFi Landing Page

### How hard is installation?

Our routers are pre-programmed and shipped to your business. You simply plug them in and you are ready to go!

### What makes our routers unique?

We select from top rated routers in the market. After that, it's our experienced team, customer support and commitment to excellence that makes us the best product in the market.

### What models do you offer?

Our base model is the **GNSR-70** TP-Link dual band router. It delivers an affordable and reliable solution.

The **GNSR-100X** is a newer model offering WiFi6 Technology, longer range and higher data transfer rates.

### Can you mesh the routers?

Yes, we work with each client individually to identify the best WiFi solution for each specific home.

### What is the cost of the routers?

The cost varies based on the model purchased. There is an upfront cost for the router and minimal monthly fee. This fee is significantly reduced when bundled with a smart lock or noise sensor.

### Our Money-Back Guarantee

Once you install your router, our experts will work with you to put together a proven email marketing campaign. We are so confident in our strategy that we stand behind our guarantee. You will double your existing revenue from emails and double direct email bookings.

# Noise Sensors

## NoiseAware Indoor Noise Sensor

### Description

This Gen3 noise sensor monitors up-to-the-minute volume levels 24/7 and provide a unique risk score. It acts as a sensor gateway (smart-home hub) for up to 10 NoiseAware Outdoor Noise Sensors. Its tamper-resistant case mounts to any standard and decora outlets, and reports when unit has been unplugged. Guest privacy is important and no audio is ever recorded or transmitted, only Noise Risk Score and hardware telemetry.

### Features

- Colors: White or gray
- Rear-facing LED indicator (pulse = setup mode, quick flash = reset, off = normal operation)
- Wireless connectivity with range up to 75 feet from router
- Energy efficient (Consumes less than 1.5 kWh/month Data)
- Tamper proof case
- Data management best-practices followed (TrustArc verified)
- Easy reset option

## NoiseAware Outdoor Noise Sensor

### Description

This outdoor noise sensor monitors up-to-the-minute volume levels 24/7 and provide a unique risk score. It seamlessly connects to NoiseAware Indoor Noise Sensor to report data. Its tamper-resistant and weather-proof case can be mounted with screws, mounting tape, or zip-ties. Guest privacy is important and no audio is ever recorded or transmitted, only Noise Risk Score and hardware telemetry.

### Features

- Colors: White or gray
- LED indicator for operation status
- Wireless connectivity - SubGhz range up to 150 feet from NoiseAware Indoor Noise Sensor (subject to environmental conditions)
- 6 month battery-life with normal operation (subject to environmental conditions)
- Hardware cannot be manipulated without damage
- Data management best-practices followed (TrustArc verified)
- Easy reset option

*\* Requires online and in-range NoiseAware Indoor Noise Sensor to transmit data*
